

Specification Sheet

BM579

ROCK PAPER

PEELABLE

FACE:

A matt white durable paper-like product, manufactured from calcium carbonate (approximately 80%) bonded with high density polyethylene (HDPE, approximately 20%).

The face material can be printed by conventional printing techniques including flexo, screen, offset, letterpress, silkscreen.

Applications are predominantly in home and personal care but also where characteristics such as durability and matt appearance are required.

Thickness **100 micron ±5%**

Basic weight **120 gsm ±5%**

ADHESIVE:

A general purpose removable, acrylic based adhesive. The adhesive features good tack and adhesion in combination with superior and clean removability from most substrates. It has long term removability and the adhesive allows label application at a wide temperature range, retaining its removable properties even at very low temperatures.

Initial Tack **Low**

Final Adhesion **Low**

Min. App.Temp **-15°C**

Temp Range **-30°C to +80°C**

UV Resistance **Good**

Complies with FDA 175.105 and with BgVV XIV recommendations for direct contact with dry and moist non-fatty foodstuff.

The adhesive may safely stand in direct contact with dry, moist and fatty foodstuffs which have a reduction factor of at least 2 according to the Commission Regulation (EU) No 10/2011.

LINER:

A white, supercalendered glassine paper.

Thickness **53 micron ± 5%**

Basic Weight **59 gsm ±5%**

SHELF LIFE:

2 years when stored at 22° C / 50% RH

The above specification is based on information obtained from the original manufacturer and is offered in good faith in accordance with the company's conditions to determine fitness for use. No guarantee is offered or implied. It is the ultimate user's responsibility to fully test the material and determine its suitability for the application intended. Measurements and test results are nominal. In accordance with a policy of continuous product improvement the manufacturer reserves the right to amend the specification without notice.
